... all you need is light

FRISTOM Spółka z o.o. Sp. k. is a Company with family traditions, dealing with the production of lighting and electrical harnesses for the Automotive industry. The beginnings of the Company date back to the previous generation, and under the present name **“FRISTOM Spółka z o.o. Sp. k.”** it has been present on the market since **1995.** Through the years we have been constantly improving the quality of our products, and expanding our portfolio and sales range. All the activities we undertake are performed with passion. Our main goal is to provide comprehensive service, and ensure customer satisfaction, by designing, manufacturing, and marketing, the highest-quality lamps. Our products are successfully used in heavy transport, logistics, forwarding, agriculture, and private vehicles. Our main customers are wholesalers and distribution networks, as well as trailer and semi-trailer manufacturers in this country and abroad. The machines and equipment we use are **the absolute best in the Automotive industry**. There is no cutting corners with us, and **we treat each product exceptionally** – it will one day reach the end user, who must be satisfied with it. Therefore, we use not only the best materials, but also the most perfect and modern machines in their production. They provide not only **excellent quality** but also **reliability in the manufactured products**. In order to completely eliminate errors and damage, to increase the efficiency, and therefore the competitiveness, of our Company, we constantly rely on full automation of production.
It is thanks to all this that we deliver excellent and reliable products. The quality of our products and work is confirmed by the ISO 9001:2015 certificate

Nowadays, climate care and gradually depleting energy sources have become a great challenge for us. Let's start with ourselves - this is very simple. One way is to use LED technology. This is one of the easiest things we can do for the environment. So, what are the characteristic features of modern LED lighting?

- energy efficiency – consumes 85% less energy than a conventional light bulb
- longer service life – operating times range from 60,000 to 80,000 hours (thanks to such a long service life we reduce the production of so-called electro-waste)
- increased visibility – thanks to this we can reduce the number of street lamps - the lighting from our vehicle is enough
- significant reduction in CO_2 production – LED lighting does not generate heat at all; moreover, substances such as mercury are not used in its production
- simpler and cheaper disposal.

Next time you buy lighting equipment, think about whether you want to help our planet.

... all you need is light

LED WARNING Lights

Yellow light warning lights are intended for garbage trucks, roadside assistance, slurry trucks, combine harvesters, agricultural tractors, road rollers.
Blue beacons are mandatory equipment of emergency vehicles, such as ambulances, police cars, fire engines or prisoner transport vehicles.

FT-210 LED

FT-210 N LED

Directional **XA1** warning light lamps are equipped with 3 pcs of **OSRAM's** extremely efficient LEDs. Thanks to the lamp's double lens system, the light emitted by the diodes is focused and pointed in the correct direction. Thanks to this, the light signal will be visible even during difficult weather conditions, at night or during the day. The task of the FRISTOM warning lamp is, above all, to improve road safety, which is why the lamp's efficiency is at an unprecedented level. The lamp makes use of several fully approved warning flashes, which can be changed in a simple and user-friendly way. In addition, all lamps in the FT-210 series are equipped with two groups of synchronisation, so that the light signals emitted by the vehicle are organised and friendly to the observer. ***The synchronisation system is compatible with the FT-200 series lamps, which allows them to be connected together.***

The lamp housing is made of impact-resistant material, and in combination with a lampshade made of polycarbonate (**PC**) creates a product that is extremely durable and resistant to mechanical damage, shocks, as well as moisture, all certified with appropriate certificates. The high reliability, modern shape and compact design of the lamp make this product widely used in modern special-purpose vehicles, e.g. for transporting large-size loads, vehicles participating in repairs and road construction, road assistance, as well as in refuse collection vehicles.

TECHNICAL SPECIFICATION:
- 3 LED **OSRAM** diodes
- supply voltage: **12–36V DC**
- **Power consumption: 12V/24V/ Peak power consumption: 0.3A/0.15A**
- **Rated power: (Peak) = 4 W**
- **ECE no.65 (XA1)** lamps homologation
- Flash frequency: **f = 2.0 Hz** (single, double, triple flash)
- **EMC R10** Certificate
- fully waterproof **(IP68)**
- shock resistance - **IK**
- Operating temperature: **–40 °C** to **+55 °C**
- reverse polarity protection system
- **GROUND** – white wire; **PLUS** – black wire
  SYNCHRONIZATION – yellow wire

E 9 IP 68 EMC

Category XB1 directional lamps generating emergency light have been fitted with 6 extraordinarily efficient **OSRAM** LEDs. Owing to the double lens system implemented in the lamp, the light emitted by the diodes is focused and cast in the right direction. The light signal will therefore be noticed even in dire weather conditions, both during the day and at night. Luminous efficacy of the lamp is at a level never seen before. The lamp emits a few fully certified light flashes that are easily customisable in a user–friendly manner. Additionally, all FT-200N lamps are equipped with two synchronisation groups that render the light signals emitted by the vehicle structured and easy on passers–by.
The lamp housing, made of an impact–resistant material, has been combined with a lampshade made of polycarbonate (**PC**) to create a product that is extremely durable and resistant to mechanical damage, shocks as well as moisture, all of which is attested by relevant certificates.
High reliability, modern shape, and compact design of the lamp make this product widely used in a variety of present–day emergency vehicles, e.g. ambulances, financial law enforcement vans, or tankers of sanitisation companies.

Technical specifications:
- 6 **OSRAM** LEDs
- Operating voltage range **12–36V DC**
- **Power consumption: 12V/24V/**
  Peak power consumption: 0.6A/0.3A
- Rated power: Peak = **8 watts**
- Homologation of warning lamps **ECE no. 65 (XB1)**
- Flash frequency: **f = 2Hz** (single, double, triple flash)
- Certificate of electromagnetic compatibility – **(EMC)**
- Fully waterproof lamp – **IP68**
- Shock–resistant lamp – **IK**
- Optimal lamp operating temperature: **–40°C** to **+55°C**
- The lamp has a reverse polarity protection system

Ground – white wire; **PLUS** – black wire;
Synchronisation/programme change – yellow wire

Our new LED warning lamp **FT-200 LED** has been equipped with **6 pcs** of extremely efficient **OSRAM diodes**. Due to implementation of the double lens system the lamp generates focussed light in a proper direction. The light signal could be easily perceived in a very hard weather conditions both at night and during the day. Most of all, the major goal of the FT-200 LED lamp is to improve the road safety. The lamp is equipped with **6 different flashing programmes** which are easily customizable. The lamp housing is shock-resistant and in combination with **PC** lampshade becomes one of the most durable product on the market what is attested by several certificates.

Widespread application:
- Bulky loads transportation
- Roadside assistance services
- Security services

Technical specification:
- 6 x **OSRAM** diodes
- universal supply voltage – from **12V up to 36V DC**
- **power consumption: 12V/24V/**
  Peak power consumption 0.6A/1=0.3A
- rated power (peak): **8 W**
- **ECE no.65 (XA1)** lamps homologation
- flash frequency: **f = 2.0 Hz (single, double, triple flash)**
- ElectroMagnetic Compatibility – **EMC** certificate
- fully waterproof **(IP68)**
- operating temperature: **–40°C** to **+ 55°C**
- reverse polarity protection system:
- **GROUND** – white wire; **PLUS** – black wire
  SYNCHRONIZATION – yellow wire
- Different holder assembly possibility
- 6 programes
- Modern design
- Yellow light
- Different lamps synchronization possibility

The new series of universal **LED** warning lamps **FT-150 LED** is equipped with 9 highly efficient **CREE** LED's that bring outstanding lighting parameters. It influences significantly on the safety on the road. The housing and other lamp parts are made of top quality materials (**PC** - polycarbonates) and electronic components highly resistant to both high and low temperatures, mechanical damages and vibrations. High operational reliability, modern design and compact structure make the product popular in the modern, special use vehicles.

Technical specification:
- Application of 9 **CREE** LED diodes
- Universal supply votlage **12–36V**
- Peak power consumption: **1,2A/0,6A/0,32A**, average power consumption: **0,5A/0,25A/0,13A**
- Peak/average rated power: **15W/6W**
- Special warning lamp approval compliant with **ECE** Regulation 65 (TA1)
- Flash frequency: **f = 2,0 Hz** (single flash)
- Full waterproofness **(IP68)**
- Shock-resistance – **IK**
- ElectroMagnetic Compatibility – **EMC** certificate
- Operating temperature **–40°C** to **+55°C**
- Reverse polarity protection
- **Ground** (-) white wire; **Plus** (+) black wire

Series of warning lamps **FT-101 LED** is equipped with 20 highly efficient **CREE** diodes that considerably influence on optimall targeted beam of light visible even under severe weather conditions. The body is made of impact-resistant material and along with the lampshade made of polycarbonate (**PC**) forms an extremely solid and resistant to mechanical damage, moisture and shock product that is confirmed with the relevant certificate. High reliability, modern shape and compact design go perfectly with the modern special-purpose vehicles.

MANUFACTURER OF LIGHTING AND CABLE HARNESSES

FRISTOM Spółka z o.o. Sp. k. is a Company with family traditions, dealing withproduction of lighting and electric harnesses for the automotive industry. The beginnings of the company's activitygo back to an earlier generation, and under the current name of **"FRISTOM Spółka z o.o. Sp. k."** has been operating on the market since **1995**.

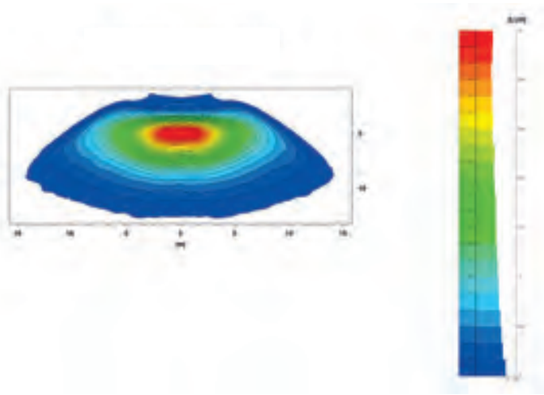
Why FRISTOM?

You will receive comprehensive service with us. We will provide an cable harnesses, rear lamps, number plate lighting, marker lamps ..., all electrics that are necessary in 12V trailers. We are specialists in this field. All lamps are EMC certified authorizing the installation of our products on trailers. We have extensive technical knowledge thanks to which we will help you choose the right onelighting and cable harnesses in accordance with the regulations,adjusted to the length of the trailer. We have been trusted by many companies not only from Poland,but also from Europe.

A FAMILY COMPANY – A GLOBAL BRAND

LED WORK Lamps

All lamps in our offer are characterized
by the highest quality
– **they have a robust body and small dimensions**.
They are equipped
with extremely efficient LEDs of high light output.



EMC IP 68

The new series of FRISTOM universal **LED** work lamps **FT-360 LED** and **FT-361 LED** is equipped with highly efficient LED diodes of **CREE**. Installed in an aluminum housing in order to create optimal working conditions that guarantee high and constant parameters of brightness, reliability and long-term durability of the product. These lamps have already found a very wide application in land and water transport, agriculture and construction. The housing and other lamp parts are made of top quality materials and electronic companents highly resistant to both high and low temperatures, mechanical damages and vibrations. The small dimensions of the lamp allow it to be mounted even in the most inaccessible locations.

FT-360 LED – wide lighting beam (illumination of close working area).
FT-361 LED – focused beam of light (illumination of the far working field).

Technical specification:
- Wide operating voltage range of **12–36V DC**
- **Power consumption: 12V/24V/48V = 3.2A/1.6A/0.8A**
- **Rated power: 38 W**
- Light color temperature about **5700K** (natural color, optimal to human eyes)
- Theoretical light beam **4100 lm** (Effective light beam **3500 lm**)
- Electromagnetic Compatibility Certificate – **EMC**
- Optimum work temperature: **–40°C** to **+35°C**
- **Ground** – white wire; **PLUS** – black wire

WARNING!
*The housing of the **FT-360 LED** and **FT-361 LED** lamps also functions as a thermal radiator and can therefore heat up significantly!*

The new series of universal **LED** work lamps **FT-036 LED ALU 2800** is equipped with higly efficient **CREE** LED's and an alluminium housing that brings outstanding lighting parameters. Fristom work lamps are widely used both in road and water transportation, agriculture, construction and water sports. They are characterised by relatively low power consumption. Rated power of **FT-036 LED ALU 2800** lamps fluctuate around **34W**! Small overall dimensions make possible to mount the lamps in the most inaccessible locations. The housing and other lamp parts are made of top quality materials and electronic components highly resistant to both high and low temperatures, mechanical damages and vibrations.

Technical specification:
- universal suply voltage – from **12V up to 36V DC**
- **power consumption: 12V/24V/48V = 2.8A/1.4A/0.7A**
- **rated power: 34W**
- color temperature: around **6.000K** (Kelvin)
- effective (measured) light beam – **min. 2.800 lm**
- lamp with an aluminium housing, 9 x **CREE** LED's
- ElectroMagnetic Compatibility – **EMC certificate**
- full waterproofness **(IP68)**
- shock-resistance – **IK**
- operating temperature: **–40°C** to **+55°C**
- reverse polarity protection system
- fixed polarisation: **GROUND** – white wire; **(+)** – black wire

WARNING!
*The aluminium housing of **FT-036 LED ALU 2800** work lamps also performs the function of the heat sink and may become very hot!*

Series of universal **LED** work lamps **FT-036** is equipped with highly efficient LED diodes made by **OSRAM**. That process allowed us to obtain high light paramtres, about **1800 lm** for rated power consumption **13.5W**. Those lamps are widely used in both road and water transportation, agriculture, construction and in every sphere where severe atmospheric conditions occur including high humidity. The body is made of shock proof material and along with the lampshade made of polycarbonate (**PC**) form an extremely solid and resistant to mechanical damage, moisture and shock product that is confirmed with the relevant certificate. The small size allows the lamp to be placed in even the most inaccessible places.

Technical specification:
- universal supply votlage – **from 12V up to 36V DC**
- **power consumption: 12V/24V/48V = 1.1A/0.55A/0.28A**
- **rated power: 13.5W**
- color temperature: around **6.000K** (Kelvin)
- effective (measured) light beam – **1.800 lm**
  *(the minimum value is **1500 lm**, after 60 minutes of continuous use)*
- 9 x **OSRAM** LED's
- ElectroMagnetic Compatibility – **EMC certificate**
- full waterproofness **(IP68)**
- shock-resistance – **IK**
- operating temperature: **–40°C** to **+35°C**
- reverse polarity protection system
- fixed polarisation: **GROUND** - white wire; **(+)** - black wire

LED DAYTIME RUNNING Lamps

Daytime running lights are a type of **automotive lighting designed for daytime driving**. They can be used in conditions of good air transparency – from dawn to dusk. They provide motor vehicle drivers with adequate visibility of the road and the roadside.

WWW

LED daytime running lamp – low power consumption.
- reverse polarity protection system
- surge arrester
- automatic switching-off of daytime running lamps at vehicle start (**STANDBY** system)
- cable: 3.5 m

Technical specification:
- supply voltage: **12–36V**
- toperating temperature: **–40°C** do **+55°C**
- lamp is resistant to any weather conditions
- lamp is fully airtight

Power consumption / Rated power consumption:
- 12V/24V = 0.25A/3W; 0.125A/3W

INTELLIGENT STOP LIGHT

As a new trend on the market the lamp uses intelligent STOP light technology. When the fog light is on, the STOP function beams partly to meet requirements for approval.

EMC E 9

7-functional universal **LED** lamp – low power consumption
European homologation **E9**
ElectroMagnetic Compatibility (**EMC**) homologation
Shock-resistance – **PC** lampshade
Reverse polarity protection system

Lamp functions:
- rear running light
- number plate light (bottom)
- STOP light
- indicator
- reversing light
- fog light
- reflector

Technical specification:
- supply voltage: **12–36V DC**
- operating temperature: **–40°C** do **+55°C**
- lamp is resistant to any weather conditions
- lamp is fully airtight

Power consumption:
- rear running light + number plate light: **12V/24V = 0.2A/0.2A**
- STOP light: **12V/24V = 0.3A/0.3A**
- indicator: **12V/24V = 0.85A/0.85A**
- reversing light: **12V/24V = 0.2A/0.25A**
- fog light: **12V/24V = 0.15A/0.15A**

Power consumption / Rated power:
- rear running light + number plate light: **12V/24V = 2.5W/5W**
- STOP light: **12V/24V = 4W/8W**
- indicator: **12V/24V = 10W/20W**
- reversing light: **12V/24V = 2.5W/6W**
- fog light: **12V/24V = 2W/4W**

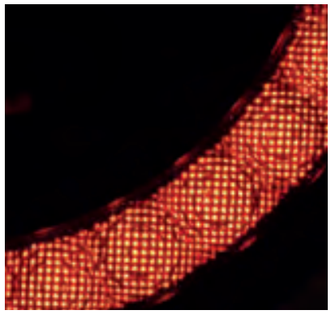
EMC E 9



3-functional universal **LED** rear lamp – low power consumption
European **E9** homologation
ElectroMagnetic Compatibility – **EMC** certificate
Shock-resistance – **PC** lampshade
Reverse polarity protection system
The lamp depth is only **35 mm**
Dynamic indicator
Crystal-like position light

In the lamp it has been used an **innovative** position light that **imitates microcrystals**. This solution creates the **illusion of living light**, even while looking at the lamp from different angles.

Lamp functions:
- rear position light
- STOP light
- indicator

Technical specification:
- supply voltage: **12–36V DC**
- operating temperature: **–40°C** to **+55°C**
- lamp is resistant to any weather conditions
- lamp is **fully airtight**
- cable out **1 m**

Power consumption:
- rear position light : **12V/24V = 0.05A/0.05A**
- STOP light: **12V/24V = 0.2A/0.2A**
- indicator: **12V/24V = 0.35A/0.35A**

Power consumption / Rated power:
- rear position light : **12V/24V = 0.6W/1.2W**
- STOP light: **12V/24V = 2.5W/5W**
- indicator: **12V/24V = 4.5W/9W**

Rear Combination Lamp, 7 function – full LED version

LAMP FUNCTIONS:
- rear position light
- number plate light
- brake light (STOP)
- direction indicator
- reverse light
- rear fog light
- triangle reflex reflector

TECHNICAL SPECIFICATION:
- supply voltage: **12–36V DC**
- operating temperature: **–40°C** to **+55°C**
- reverse polarity protection
- the lamp is equipped with the interchangeable anti-shock modules resistant to any weather conditions

LED POWER CONSUMPTION:
- rear position light + number plate light **12V/24V = 0,12A / 0,12A**
- brake light (STOP): **12V/24V = 0.34A/0.17A**
- direction indicator: **12V/24V = 0.4A/0.2A**
- revere light: **12V/24V = 0.1A/0.05A**
- rear fog light: **12V/24V = 0.34A/0.17A**

POWER CONSUMPTION (RATED POWER):
- rear position light + number plate light **12V/24V = 1.5W / 3.0W**
- brake light (STOP): **12V/24V = 4.1W/4.1W**
- direction indicator: **12V/24V = 5W/5W**
- reverse light: **12V/24V = 1.2W/1.2W**
- rear fog light: **12V/24V = 4.1W/4.1W**

Rear Combination Lamp, 7 function – bulb version

- rear position light (LED)
- number plate light (LED)
- brake light (STOP); (P21W bulb)
- direction indicator (P21W bulb)
- reverse light (P21W bulb)
- rear fog light (P21W bulb)
- triangle reflex reflector

Rear Combination Lamps in bulb version are always equipped with LED position light and LED number plate light.

EMC E 9

7-functional universal **LED** lamp – low power consumption
- european homologation **E9**
- ElectroMagnetic Compatibility **(EMC)** homologation
- shock-resistance – **PC** lampshade
- reverse polarity protection system

Technical specification:
- rear running light
- number plate light
- **STOP** light
- indicator
- fog light
- reflector
- reversing light

Technical specification:
- supply voltage: **12–36V DC**
- operating temperature: **–40°C** to **+55°C**
- lamp is resistant to any weather conditions
- lamp is fully airtight

Power consumption:
- rear running light + number plate light – **12/ 24V = 0.25A/ 0.2A**
- STOP light – **12/ 24V = 0.08A/0.08A**
- indicator – **12/ 24V = 0.12A/0.12A**
- reversing light – **12/ 24V = 0.2A/ 0.1A**
- fog light – **12/ 24V = 0.15A/ 0.08A**

Power consumption / Rated power:
- rear running light + number plate light – **12/ 24V = 3W/ 5W**
- STOP light – **12/ 24V = 1W/ 2W**
- indicator – **12/ 24V = 1.5W/ 3W**
- reversing light – **12/ 24V = 2.5W/2.5W**
- fog light – **12/ 24V = 2W/2W**

FT-130 PM LED

FT-130 COF LED

EMC E 9

6-functional universal **LED** rear lamp - low power consumption
- european homologation **E9**
- ElectroMagnetic Compatibility **(EMC)** homologation
- shock-resistance – **PC** lampshade
- reverse polarity protection system

Lamp functions:
- rear running light
- number plate light homologated on an universal performance 34.4 mm<<X>>102.2 mm
- **STOP** light
- indicator
- fog light **(FT-130 PM LED)** or reversing **(FT-130 COF LED)** light (depending on the product version)
- reflector

Technical specification:
- supply voltage: **12–36V DC**
- operating temperature: **–40°C** to **+55°C**
- lamp is resistant to any weather conditions
- lamp is fully airtight

Power consumption:
- rear running light + number plate light **– 12V/ 24V = 0.25/ 0.21A**
- STOP light – **12V/ 24V = 0.08A/0.08A**
- indicator – **12V/ 24V = 0.11A/0.11A**
- fog light – **12V/ 24V = 0.12A/ 0.6A**
- reversing light – **12V/ 24V = 0.28A/ 0.14A**

Power consumption / Rated power:
- rear running light + number plate light – **12/ 24V = 3W/ 5W**
- STOP light –**12V/ 24V = 1W/ 2W**
- indicator – **12V/ 24V = 1.5W/ 3W**
- fog light – **12V/ 24V = 1.5W/1.5W**
- reversing light – **12/ 24V = 3.5W/3.5W**

Small LAMP COVER

The tail lamp cover is primarily used to protect the lamp's electrical connector with an electric bundle against harmful weather conditions such as: water, mud or road salt in winter conditions. The cover is made of high quality material, making it extremely durable.

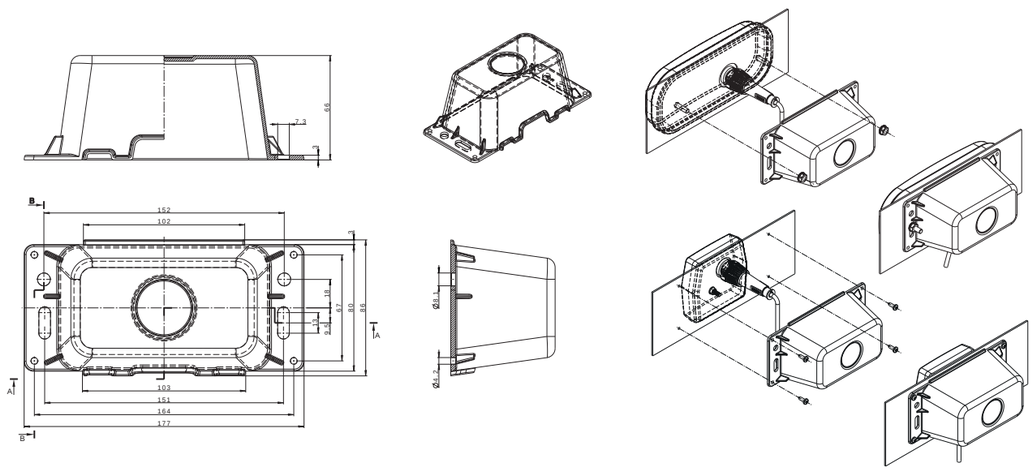
Application of this product:

- will significantly extend the life of the lamp connector
- it will allow you to hide the excess wire inside the cover.

It can be mounted with rear lamps with mounting bolt spacing 150–152mm.

For Fristom lamps with Bayonet or AMP connector you can list the following products:

FT-277 LED	**FT-230 LED**	**FT-270 LED**	**FT-170 LED**
FT-130 LED	**FT-077**	**FT-088**	**FT-089**



Big LAMP COVER

The tail lamp cover is primarily used to protect the lamp's electrical connector with an electric bundle against harmful weather conditions such as: water, mud or road salt in winter conditions. The cover is made of high quality material, making it extremely durable.

Application of this product:

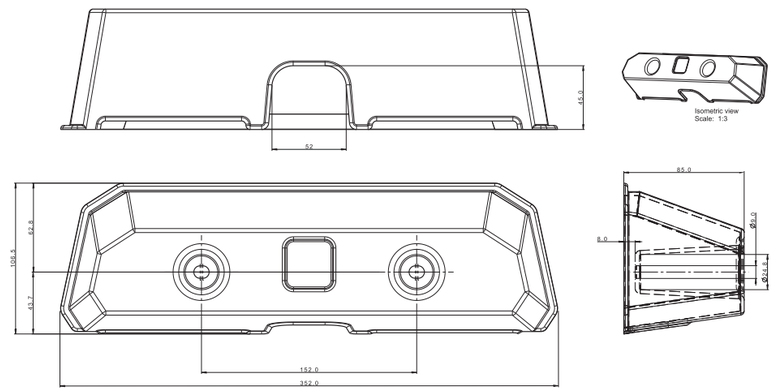
- will significantly extend the life of the lamp connector
- it will allow you to hide the excess wire inside the cover.

It can be mounted with rear lamps with mounting bolt spacing 150–152mm.

For Fristom lamps with Bayonet or AMP connector you can list the following products:

FT-700 LED	**FT-600 LED**	**FT-610 LED**	**FT-500 LED**

*Lamp cover can also be used for lamps from manufacturers such as **ASPOECK** or **HELLA**.*



Third break LIGHT (STOP)

The third brake light
protects you from
the serious consequences
of a collision or road accident.

WWW

1-functional **LED** lamp – low power consumption
- ElectroMagnetic Compatibility – **EMC** certificate
- shock-resistance – **PC** lampshade
- optional polarity connection
- lamp is equipped with 2x075 mm^2 wire
- the vertical and horizontal assembly is possible by means of double-sided tape or/and two screws.

Lamp functions:
- lamp has a third break light function
- application: trailers; semi-trailers; special vehicles and others

Lamp parameters:
Universal supply voltage: **12–36V DC**
Operating temperature: **–40°C** to **+55°C**
Lamp is resistant to any weather conditions
Lamp is fully airthight

Power consumption:
- **12V/24V = 0.08A/0.08A**

Power consumption (rated power):
- **12V/24V = 1W/2W**

CLEARANCE *Lamps*

Clearance lamps are an indispensable type of vehicle lighting. They are used in trailers, car carriers and semi-trailers. They mark the **outer contour of the vehicle**, therefore they are mounted at the front, at the rear and on the sides of the vehicle.

LED Clearance lamps

◊ Standard length of the cable 0.5 m, 2x0.75 mm^2
QS075 – *Electrical connector enabling connection of the lamp to a 2x0.75 mm^2 diameter electrical installation*
QS150 – *Electrical connector enabling connection of the lamp to a 2x1.50 mm^2 diameter electrical installation*

◊ Nonstandard length of the cable (QS075, QS150) – on order.
Lead time is individually determined.

EMC E 9

1-functional **LED** lamp
- ElectroMagnetic Compatibility – **EMC** certificate
- shock-resistance – **PC lampshade**
- optional polarity connection
- lamp is equipped with 2x075 mm² wire; 0.5 m lenght.
- the vertical and horizontal assembly is possible by means of double-sided tape or/and two screws.

Lamp functions:
- **position front light (FT-195 B LED)**
- **postion rear light (FT-195 C LED)**
- **positon side light (FT-195 Z LED)**
- application: trailers; semi-trailers; special vehicles and others

Lamp parameters:
Universal supply voltage: **12–36V DC**
Operating temperature: **–40°C** to **+55°C**
Lamp is resistant to any weather conditions
Lamp is fully airthight

Power consumption:
- **12V/24V = 0.08A/0.08A (FT-195 B LED)**
- **12V/24V = 0.025A/0.025A (FT-195 C LED)**
- **12V/24V = 0.05A/0.05A (FT-195 Z LED)**

Power consumption (rated power):
- **12V/24V = 1W/2W (FT-195 B LED)**
- **12V/24V = 0.3W/0.6W (FT-195 C LED)**
- **12V/24V = 0.6W/1.2W (FT-195 Z LED)**

EMC E 9

2-functional **LED** clearance lamp with a reflector
European **E9** homologation
Shock-resistance – **PC** lampshade
Three power cords:
Ground – white, clearance lamp function – black, indicator lamp function – yellow
When the indicator light function works, the side clearance light function is switched off.

NEW TECHNOLOGICAL SOLUTIONS
IMPROVED AIRTIGHTNES OF ELECTRONIC MODULE
INNOVATIVE ASSEMBLY „CLICK-ON"
HIGH LEVEL OF LIGHT EMISSION
TIMELESS DESIGN
ASSEMBLY SCREWS ARE NOT VISIBLE

Lamp functions:
- side clearance light
- indicator light **CAT. 5**
- side reflector function

Technical specification:
- supply voltage: **12–36V DC**
- operating temperature: **–40°C** to **+55°C**
- lamp is resistant to any weather conditions
- lamp is fully airtight

Power consumption:
- Clearance light **12V/24V=0.08A/0.08A**
- Indicator light **12V/24V = 0.08A/0.08A**

Power consumption / Rated power:
- **12V/24V = 1.0W/2.0W**

EMC

E 9

1-functional **LED** clearance lamp with a reflector
- european **E9** homologation
- ElectroMagnetic Compatibility – **EMC** certificate
- shock-resistance – **PC** lampshade
- optional polarity connection

The lamp meets ADR requirements.

The unique lamp construction solution which increases air-tightness
and the light and electronic components resistance to any external conditions.
The revolutionary system of assembly – there are no visible signs
of joining bodywork with lamp surface.
The lamp is available in two versions and presents a revolutionary light emission system
which goes along with an innovative design. This combination procures that with
the highest probability our lamp is the most recognizable and eye-catching product on the market.

Lamp functions:
rear clearance light with reflector
front clearance light with reflector
side clearance light with reflector

Technical specification:
- supply voltage: **12–36V DC**
- operating temperature: **–40°C** to **+55°C**

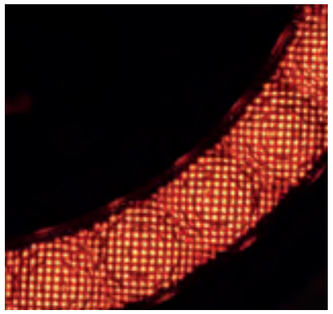
REVERSING *Lamps*

The purpose of these products
is to **signal** to other road users
the **driver's intention to revers**e.
The lamp turns on automatically
when we **use reverse gear**.

WWW

VIDEO



EMC E 9

3-functional **LED** lamp – low power consumption
European **E9** homologation
ElectroMagnetic Compatibility – **EMC** certificate
Shock-resistance – **PC** lampshade
Reverse polarity protection system
The lamp depth is only **35 mm**
Crystal-like position light

In the lamp it has been used an **innovative** position light that **imitates microcrystals**. This solution creates the illusion of **living light**, even while looking at the lamp from different angles.

Lamp functions:
- rear running light
- reversing light
- fog light

Technical specification:
- supply voltage: **12–36V DC**
- operating temperature: **–40°C** to **+55°C**
- lamp is resistant to any weather conditions
- lamp is fully airtight
- cable out **1 m**

Power consumption:
- rear running light: **12V/24V = 0.05A/0.05A**
- reversing light: **12V/24V = 0.2A/0.12A**
- fog light: **12V/24V = 0.25A/0.15A**

Power consumption / Rated power:
- rear running light: **12V/24V = 0.6W/1.2W**
- reversing light: **12V/24V = 2.4W/3W**
- fog light **12V/24V = 3W/3.6W**

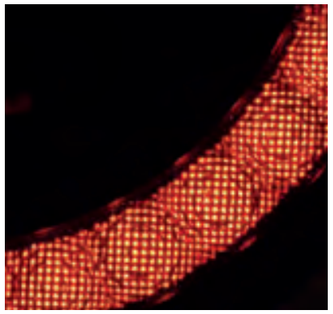
FOG Lamps

Fog lamps ensure adequate **visibility in unfavourable weather** conditions. They are used only in conditions **of insufficient air transparency**

WWW

VIDEO



EMC E 9

3-functional **LED** lamp – low power consumption
European **E9** homologation
ElectroMagnetic Compatibility – **EMC** certificate
Shock-resistance – **PC** lampshade
Reverse polarity protection system
The lamp depth is only **35 mm**
Crystal-like position light

In the lamp it has been used an **innovative** position light that **imitates microcrystals**. This solution creates the illusion of **living light**, even while looking at the lamp from different angles.

Lamp functions:
- rear running light
- reversing light
- fog light

Technical specification:
- supply voltage: **12–36V DC**
- operating temperature: **–40°C** to **+55°C**
- lamp is resistant to any weather conditions
- lamp is fully airtight
- cable out **1 m**

Power consumption:
- rear running light: **12V/24V = 0.05A/0.05A**
- reversing light: **12V/24V = 0.2A/0.12A**
- fog light: **12V/24V = 0.25A/0.15A**

Power consumption / Rated power:
- rear running light: **12V/24V = 0.6W/1.2W**
- reversing light: **12V/24V = 2.4W/3W**
- fog light **12V/24V = 3W/3.6W**

Number plate LED lamp, 2-functional

2-functional number plate **LED** lamp – low power consumption
- european **E9** homologation
- ElectroMagnetic Compatibility – **EMC** certificate
- shock-resistance – **PC** lampshade
- optional polarity connection

Lamp functions:
- reversing rear light
- number plate light

Technical specification:
- supply voltage: **12–36V DC**
- operating temperature: **–40°C** to **+55°C**
- lamp is resistant to any weather conditions
- lamp is fully airtight

Power consumption:
-12V/24V=0.06A/0.06A

Power consumption / Rated power:
-12V/24V=0.75W/1.5W

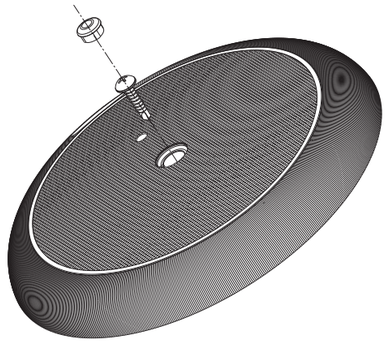
INTERIOR *Lighting*

Interior lighting lamps **perfectly illuminate the interior of any vehicle**. They improve the comfort of travellers during stops and **improve visibility in the vehicle cabin**.

1200 LM



Series of modern interior **LED** type lamps in a round version has become widely used in the energy-saving electrical installations and also in the widely understood automotive industry such as: cabin lights, load beds, horse trailers and caravans. The main advantages of this lamp are extremely high light emission with a natural. Due to its compact size, shock resistance, easy installation and waterproofness the lamp is very appreciated in motorboat industry.
Mounting by means of a self-drilling screw (included).

Technical specification:
- Supply voltage: **12–36 V DC**
- Polarization is not optimal: **(+)** – black wire; **(–)** – white wire
- Power consumption: **12V/24V = 1.0A/0.5A**
- Power consumption (rated power): **12V/24V = 12 Watt**
- Effective (measured) light beam: **1200 lm**
- Operating temperature: **–40°C** to **+55°C**
- Color temperature: **white, neutral; 4000K**

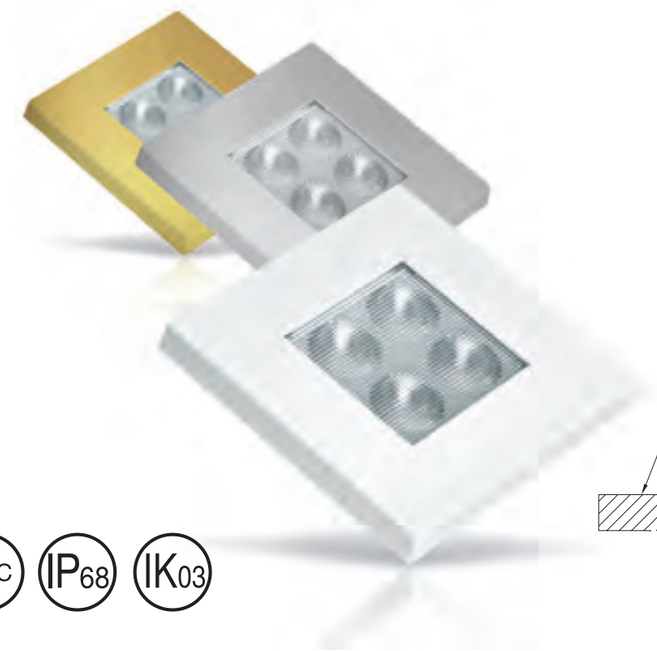
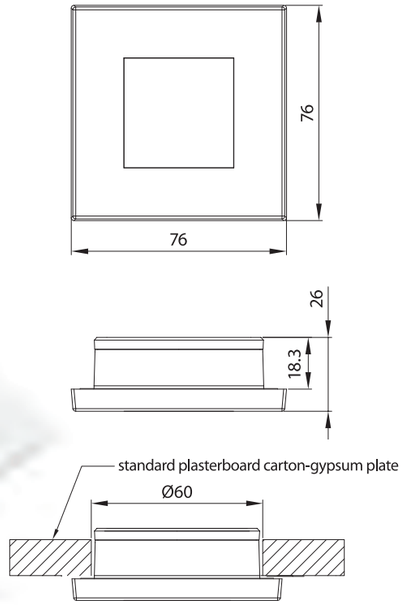
FT-161 LED 5907556015586		LED interior lamp 12-36V, round, white, wire 0.15 m.	1	0.184	89	59x39x29	16.90	1780	120x80x165	363.00





Series of modern interior **LED** type lamps in a square version have become widely used in energy-saving electrical installations and also in the widely understood automotive industry and households. The main features of this lamp include: low power consumption thereby maintaining light efficiency comparable with **20W** halogen bulb; supply possibility with DC voltage and AC voltage – i.e. the possibility to supply with **230W AC** voltage via a transformer.
Due to its small size; shock resistance and easy installation but also due to its waterproofness the lamp is very appreciated in motorboat industry. The lamps are equipped with removable frame type housings. Standard version includes lamps with white, silver and gold frames. There is also a possibility to realize special orders for any housing color.

Technical specification:
- supply voltage: **9–36V (DC or AC)**
- optional polarity connection
- power consumption – **9V/36V = 0.28A/0.08A**
- power consumption (rated power) – **9V/36V = 2.6W**
- light flux: equivalent of the standard **12V–20V bulb**
- operating temperature: **–40°C** to **+55°C**
- color temperature: white/warm, **3500K (Kelvin)**
- effective (measured) light beam: **140 lm**
- full waterproofness (IP68) schock and vibration resistance **(IK03)**
- shock-resistance – **PC** lampshade
- ElectroMagnetic Compatibility – **EMC** certificate
- the product meets legal requirements of the EU and it is marked by **CE**

EMC E9

Series of modern interior **LED** type lamps in a round version has become widely used in the energy-saving electrical installations and also in the widely understood automotive industry such as: cabin lights, load beds, horse trailers and caravans. The major advantages of the lamp are universal supply voltage and low power consumption that go with the high light emission. Due to its compact size, shock resistance, easy installation and waterproofness the lamp is very appreciated in motorboat industry.
The lamps are available in two versions: black and white.

Technical specification:
- Supply voltage: **12–36 V DC**
- Polarization is optional
- Power consumption: **12V/24V/36V = 0,4A/0.2A/0.14A**
- Power consumption (rated power): **12V–36V=5 Watt**
- Effective (measured) light beam: **420 lm**
- Operating temperature: **–40°C** to **+55°C**
- Color temperature: white, neutral; **4000K**
- PC lampshade made with a very durable material
